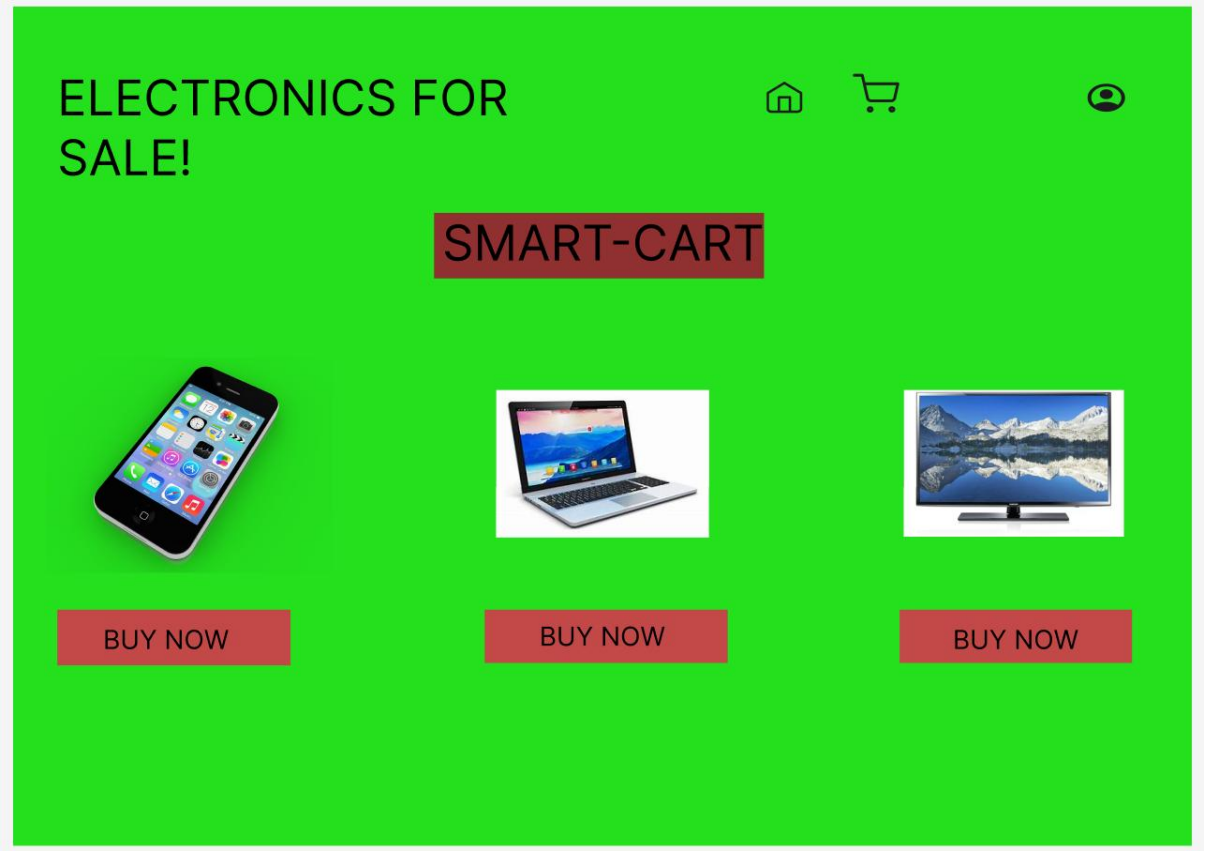
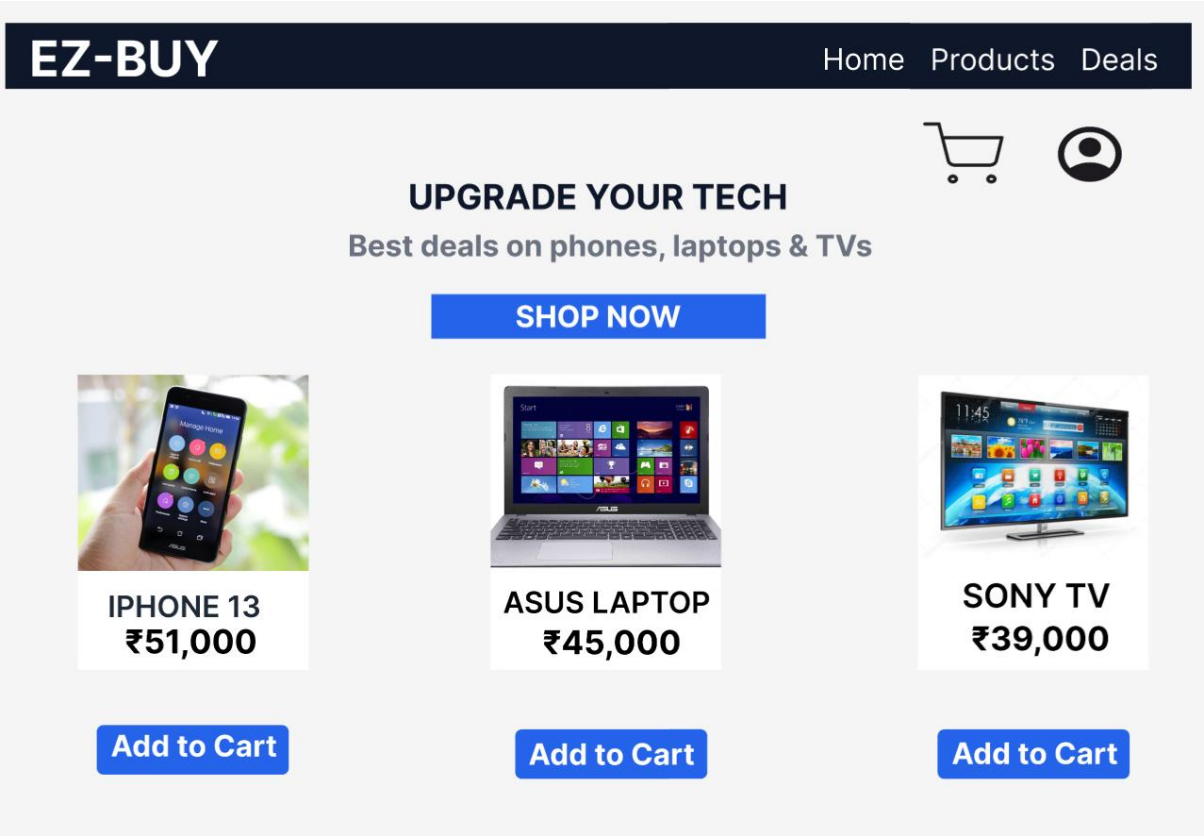
USER INTERFACE AND DESIGN

COMAPARSION OF UI DESIGN BETWEEN TWO FIGMA CREATION

**BAD WEBSITE:**



**GOOD WEBSITE:**



**PROTOTYPE LINK:**

https://www.figma.com/proto/AxutHawMM0nlmjvjcj2nBX/Untitled?node-id=1-2&p=f&t=K01sGFPhBCZqVBjh-1&scaling=min-zoom&content-scaling=fixed&page-id=0%3A1

The two websites have distinct designs and approaches. Here's a comparison:

**BAD WEBSITE (SMART-CART):**

1. **Poor Colour Choice**

- Bright green background is too harsh and distracting.
- Causes eye strain and reduces readability.
- No proper colour harmony between background, text, and buttons.

2. **Low Visual Hierarchy**

- Headings, images, and buttons compete for attention.
- User cannot immediately identify the main action.

3. **Inconsistent Spacing & Alignment**

- Elements are not evenly spaced.
- Buttons and images feel randomly placed.
- Makes the interface look unprofessional.

4. **Weak Typography**

- Font size and weight are not well balanced.
- Text does not stand out clearly from the background.
- Reduces content clarity.

5. **Poor User Experience (UX)**

- No clear navigation structure.
- Violates basic UI principles like readability.

---

**GOOD WEBSITE (EZ-CART):**

1. **Clean and Neutral Colour Scheme**

- White/light background improves readability.
- Creates a professional and modern look.
- Allows content and images to stand out naturally.

2. **Clear Visual Hierarchy**

- Headings, product images, prices, and buttons are clearly separated.
- User instantly understands where to look first.
- Call-to-action buttons are easily noticeable.

3. **Proper Spacing and Alignment**

- Consistent margins and padding.
- Improves visual balance and flow.

4. **Readable Typography**

- Proper font size and contrast.
- Easy to scan product names and prices.

- Enhances accessibility.

5. **Better User Experience (UX)**

- Logical navigation and product grouping.
- Users can browse, understand, and act quickly.
- Follows standard UI/UX design principles.
