EXPERIMENT – 9

ROLL NO: 240701480 NAME: D.SARVESHVARAN

Design Input Forms That Validate Data and Display Error Messages Using HTML/CSS/JavaScript.

AIM:

To design input forms that validate user data such as Email and Phone Number and display appropriate error messages using HTML, CSS, JavaScript and Validator.js.

STEP 1: Create HTML Form Structure

Code:

```
<!DOCTYPE html>
<html>
<head>
<title>Form Validation</title>
</head>
<body>

<div class="box">
<h2>Form</h2>

<form id="form">

<input type="text" id="email" placeholder="Enter Email">
<small id="emailError"></small>

<input type="text" id="phone" placeholder="Enter Phone">
```

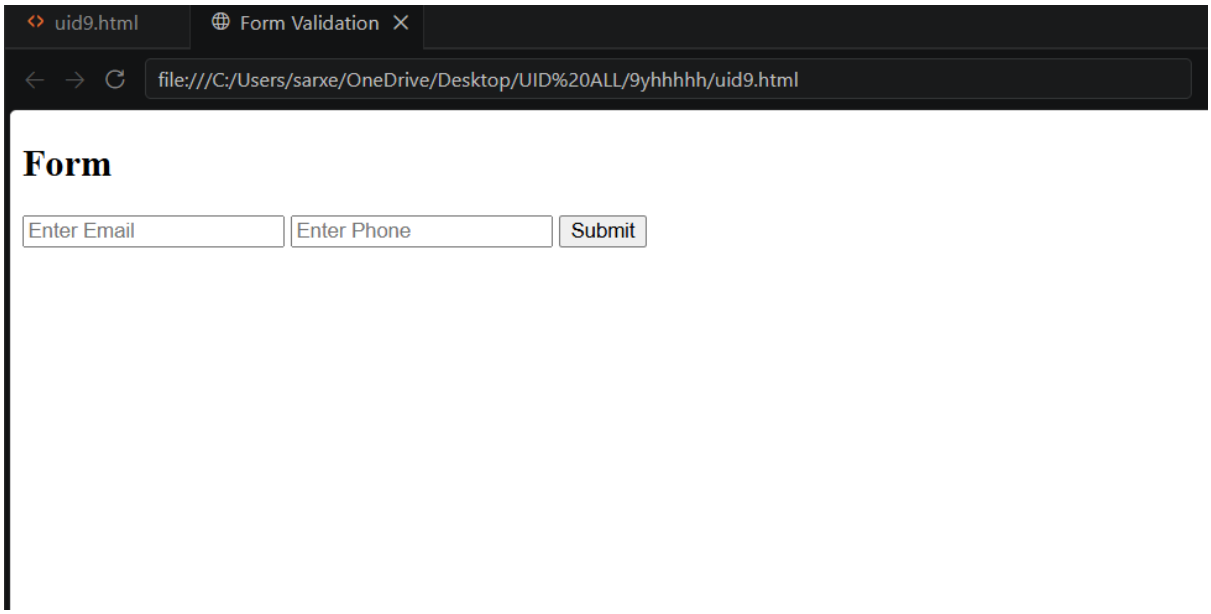
```
<small id="phoneError"></small>

<button type="submit">Submit</button>

</form>
</div>

</body>
</html>
```

OUTPUT:



STEP 2: Apply CSS Styling

Code :

```
<style>
body{
margin:0;
height:100vh;
display:flex;
justify-content:center;
```

```
align-items:center;
font-family:Arial;
background:linear-gradient(to bottom,#87ceeb,#00b4d8);
}

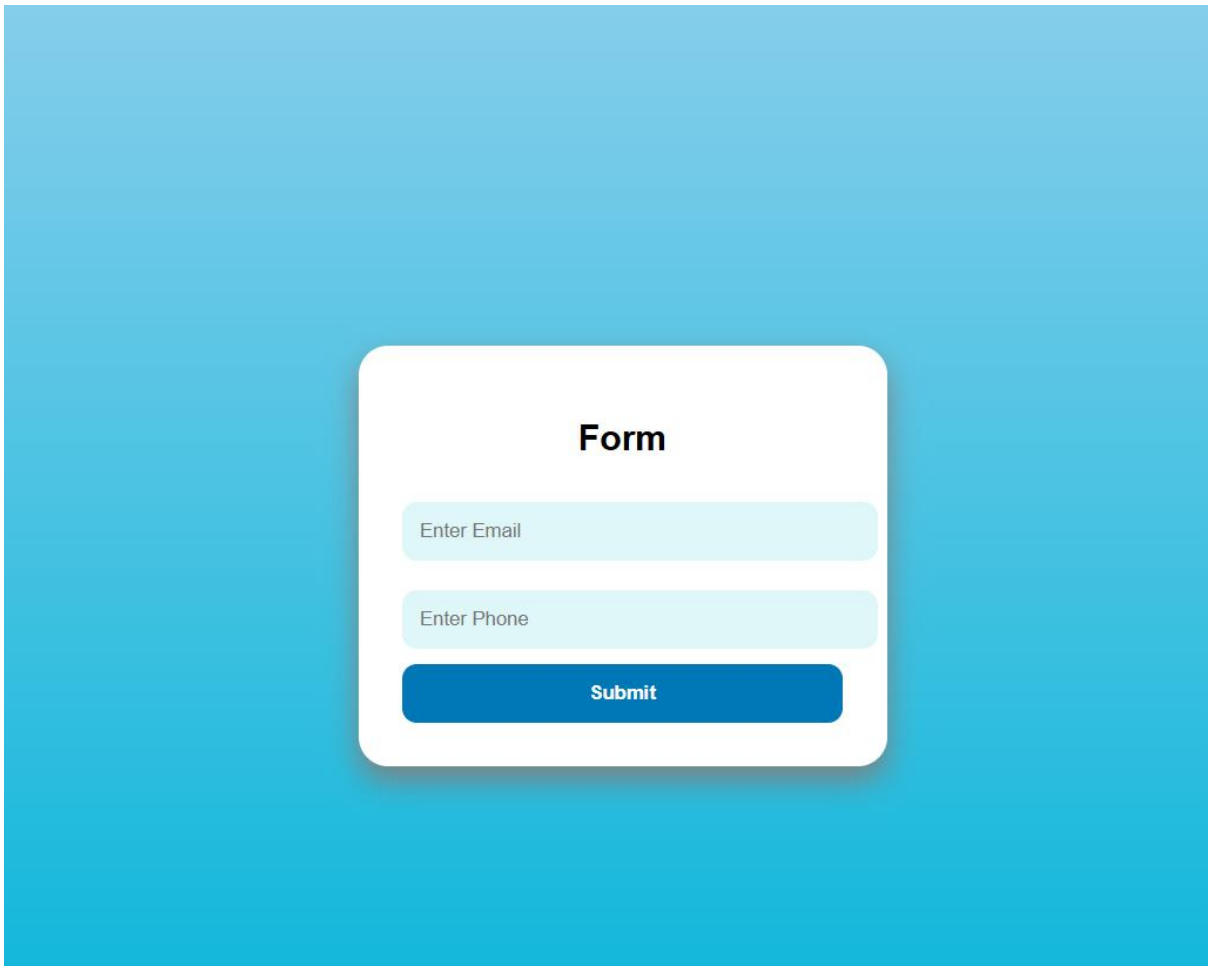
.box{
width:300px;
padding:30px;
border-radius:20px;
text-align:center;
background:white;
box-shadow:0 10px 20px gray;
}

input{
width:100%;
padding:12px;
margin:10px 0;
border-radius:10px;
border:none;
background:#e0f7fa;
}

button{
width:100%;
padding:12px;
border:none;
border-radius:10px;
background:#0077b6;
color:white;
font-weight:bold;
}

small{
color:red;
}
</style>
```

OUTPUT :



STEP 3: Add Validator.js Library

Add before JavaScript:

```
<script
src="https://cdnjs.cloudflare.com/ajax/libs/validator/13.6.0/validator.min.js"><
/script>
```

STEP 4: Add JavaScript Validation

Code:

```
<script>

document.getElementById("form").addEventListener("submit",function(e){

e.preventDefault();

let email=document.getElementById("email").value;
let phone=document.getElementById("phone").value;

let emailError=document.getElementById("emailError");
let phoneError=document.getElementById("phoneError");

emailError.textContent="";
phoneError.textContent="";

if(!validator.isEmail(email)){
emailError.textContent="Invalid Email!";
}

if(!validator.isMobilePhone(phone,"any")){
phoneError.textContent="Invalid Phone!";
}

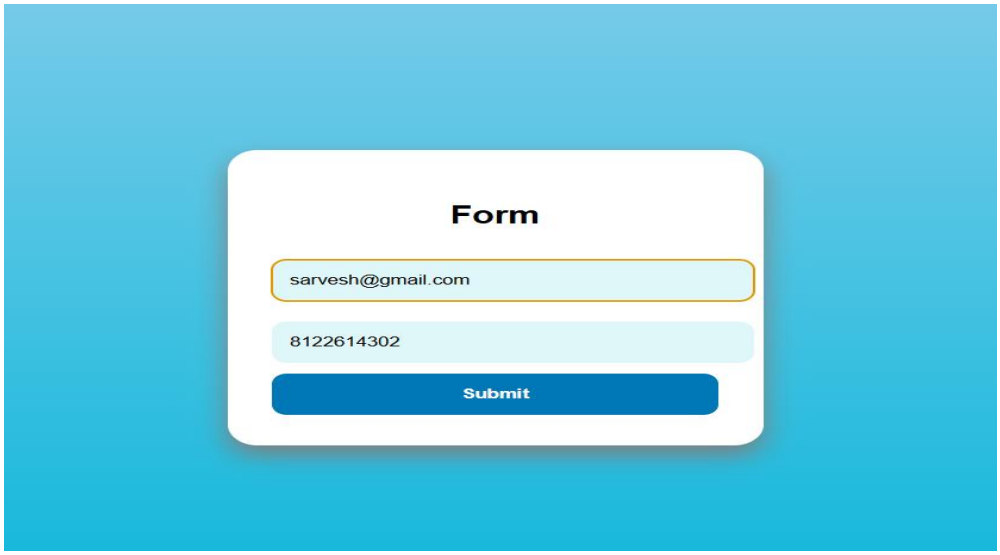
if(validator.isEmail(email) &&
validator.isMobilePhone(phone,"any")){
alert("Submitted Successfully");
}

});

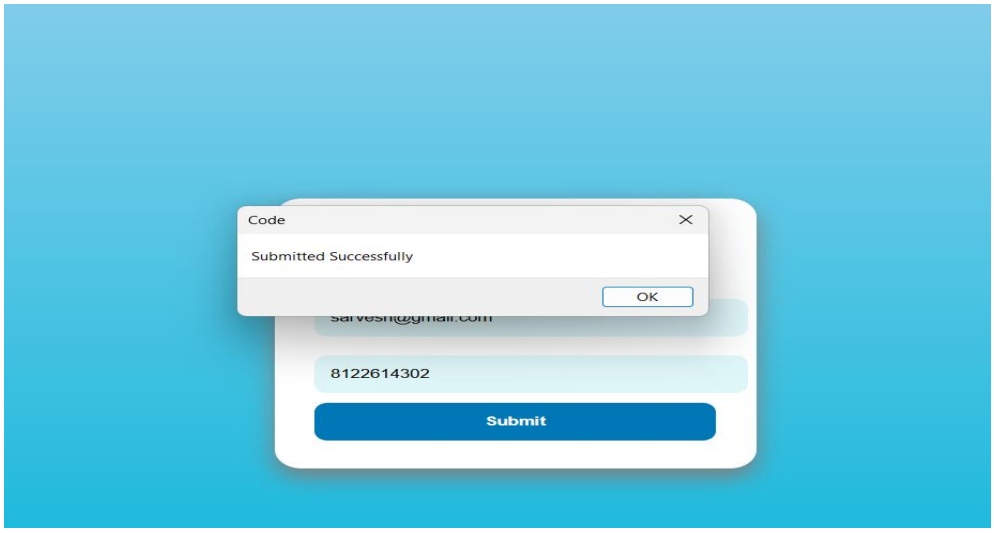
</script>
```

OUTPUT:

1.)

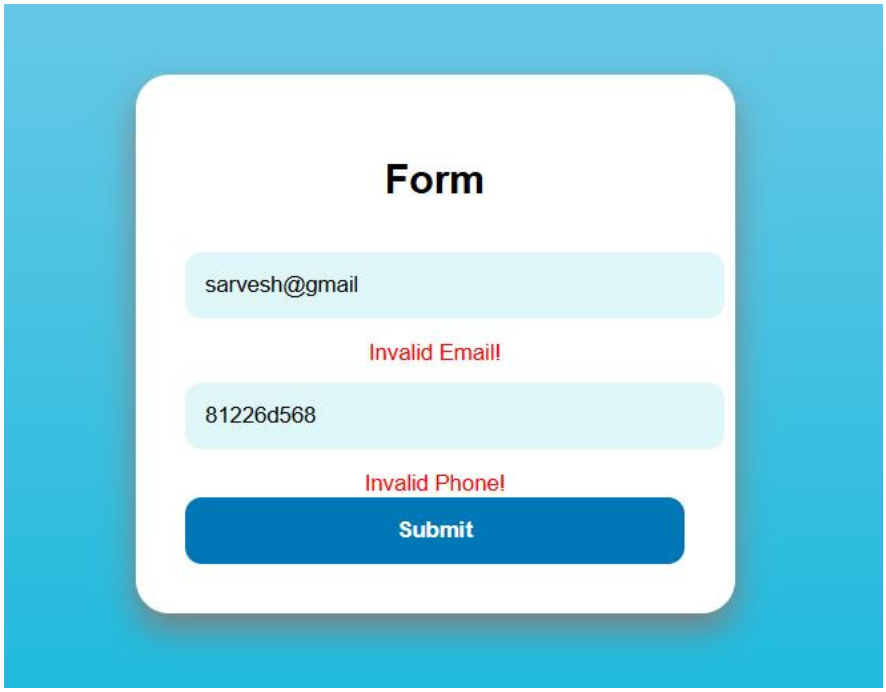


Form
sarvesh@gmail.com
8122614302
Submit



Code
Submitted Successfully
OK
8122614302
Submit

2.)



RESULT:

Thus, the input form was successfully designed using HTML, CSS, JavaScript and Validator.js to validate Email and Phone Number and display appropriate error messages.
